

48x45 Collapsible Bulk Container w/ Vented Floor

The heavy-duty Collapsible Bulk Container is used extensively by the automotive industry, as it meets the specifications of the Automotive Industry Action Group (AIAG). Unitized loads can be delivered directly to the assembly line for immediate part presentation, with no unwrapping or unbanding. Bulk containers collapse when empty for reduced return transportation costs and warehouse space savings. During storage and shipping these bulk bins stack securely atop each other.

Specifications	IN/LB
Outside Length	48.0
Outside Width	45.0
Outside Height	34.0
Inside Length	44.2
Inside Width	41.2
Product Clearance	27.5
Collapsed Height	13.1
